

# Noureldin Noury

Acoustic Engineering Consultant

Audio Engineering Consultant

## BIO

Started my professional journey by studying physics and arts, focusing on acoustic engineering, music and art analysis. My main passion was the study of acoustics and audio engineering. commenced my formal education in audio engineering at the University of Birmingham in England. I continued my studies at universities in the United States and underwent training and education at various global companies in Egypt, Germany, Spain, and the United States.

I held diverse positions as an audio engineer, collaborating with a distinguished Arab, African, and international artists. Simultaneously, I pursued my academic endeavors in acoustics. He has also been involved in the design, review, and supervision of numerous large-scale projects across the Middle East and Africa. I has actively contributed to research conducted at various global centers dedicated to the design of professional speakers and audio systems. In addition, I authored multiple research papers in this field.

Served as a consultant for several international organizations, particularly in the Middle East and Africa. I taught the science of audio engineering at various universities, as well as numerous cultural and scientific institutions. Over the years, I mentored numerous students worldwide.
